

TIGER ENGINEERING COMPANY

Efficient design, Excellent delivery

About Us

At Tiger Engineering Company , we don't just manufacture electrical products; we engineer solutions that breathe life into industries. Our commitment to excellence drives us to create cutting-edge ventilation fans, boiler fans, axial flow fans, high-pressure blowers, and industrial dust collectors.

WHY CHOOSE US?

- **Premium Materials:** We source the finest raw materials from trusted vendors, ensuring durability and reliability.
- **Skilled Craftsmanship:** Our experienced team meticulously crafts each product, adhering to strict quality standards.
- **Defect-Free Assurance:** Rigorous testing guarantees that only flawless products leave our facility.

Our Specialization

Industrial Blowers

Tube Axial Fans

Dust Collectors

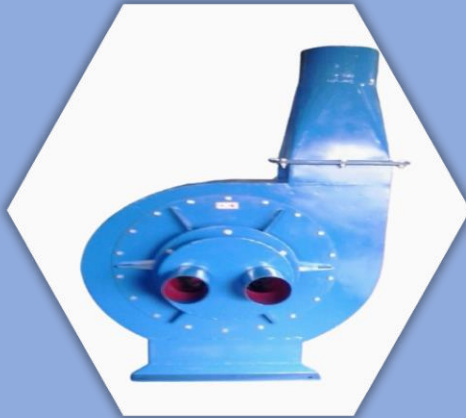

Industrial Ovens

Painting Booth

Extraction Unit

Trim-Chopper Blower

Ducting work

*** All products can be engineered based on shape, size and materiel requirements**

Industrial Blowers

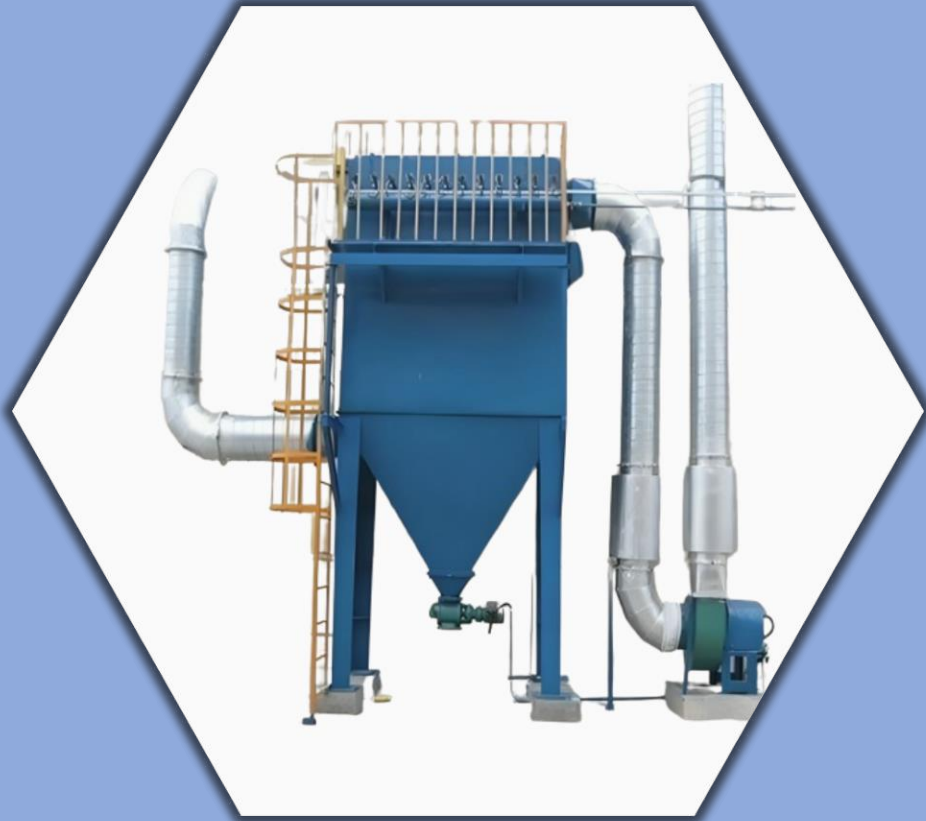

Our industrial blowers are precision-engineered for robust performance. With a focus on reliability, energy efficiency, and durability, these blowers excel in applications across various sectors. Based on the requirements we can engineered most effective solutions for manufacturing plants to large-scale engineering projects. our industrial blowers deliver consistent airflow and enhance productivity.

Tube Axial Fans

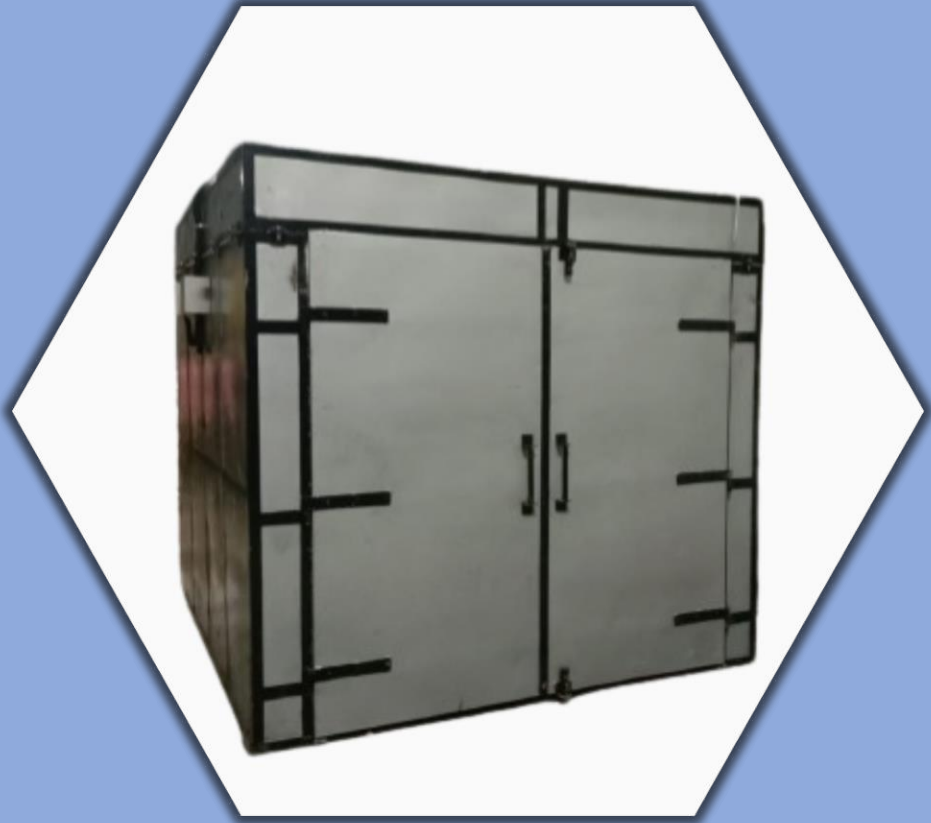

Our tube axial fans are engineered for optimal airflow efficiency. With a streamlined design, these fans minimize energy consumption while maximizing performance. Whether it's industrial ventilation, cooling, or exhaust applications, our tube axial fans deliver reliability and consistent airflow.

Dust Collector

We design and manufacture a comprehensive range of dust collection and gaseous absorption systems after a thorough and careful analysis and evaluation of your pollution problems. Systems offered are unique in their simplicity, minimum maintenance, low pressure drop, and higher efficiency. Our particulate collection and gaseous removal systems find applications in chemical industries, fertilizer industries, mineral industries, boiler houses, power plants, textile mills & foundries.

Industrial Ovens

Our industrial ovens combine cutting-edge technology with robust construction. Designed for precision and reliability, these ovens excel in applications such as curing, drying, and heat treatment. Whether it's automotive, aerospace, or food processing, our industrial ovens ensure consistent temperature control and efficient production processes.

Painting Booth

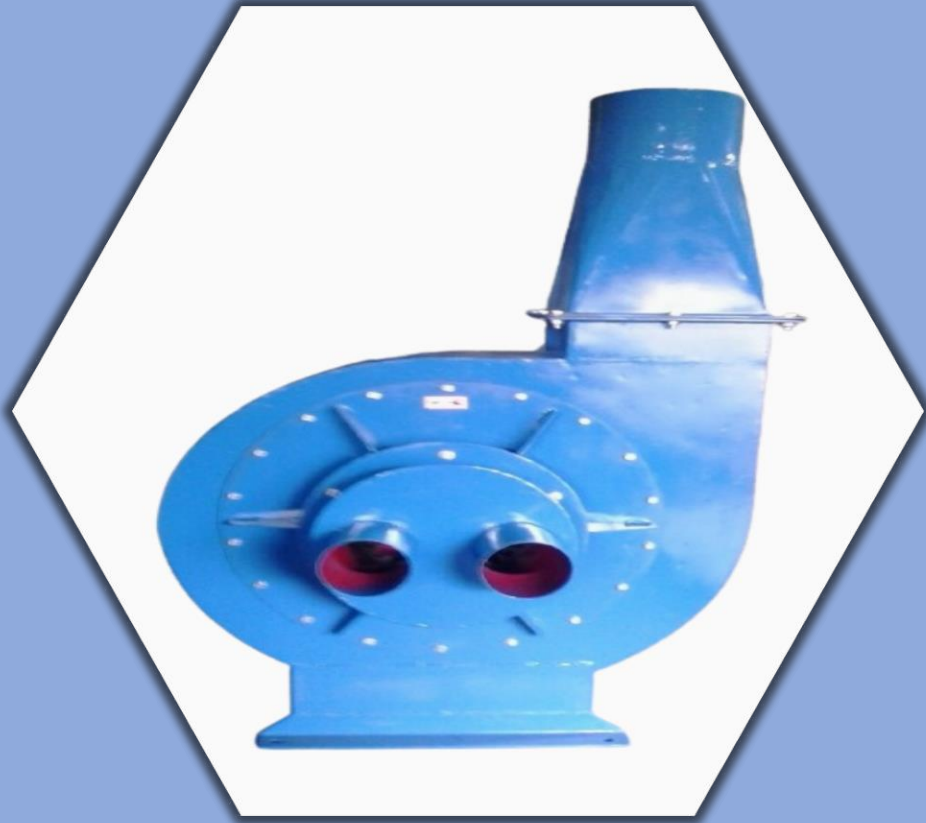

Our painting booths are meticulously designed to create an optimal environment for flawless paint application. With efficient ventilation, precise airflow control, and effective filtration systems, these booths ensure consistent results. Whether it's automotive refinishing, industrial coatings, or artistic projects, our painting booths provide a clean, well-lit space for professional finishing.

Extraction Units

Our extraction units are engineered for fiber industries. With adjustable airflow, these units ensure a healthier workplace. Whether it's metalworking or woodworking processes, our extraction units provide reliable air quality control.

Trim-Chopper Blower

Our Trim-Chopper blowers are engineered for efficient performance. With advanced blade technology, these blowers excel in applications such as pneumatic conveying, material handling, and industrial processes. Whether it's bulk material transport or ventilation systems, our Trim-Chopper blowers ensure reliability and optimal productivity.

Ducting Works

Our ducting solutions are meticulously crafted to optimize airflow, minimize pressure loss, and ensure efficient ventilation. Whether it's industrial exhaust systems, HVAC installations, or cleanroom environments, our ducting works seamlessly. Trust us for reliable, customized solutions that enhance air quality and maintain a comfortable atmosphere.

Areas of focus

1. Manufacturing and Processing Plants: Our blowers enhance ventilation, cooling, and material handling in factories and production facilities.

2. Power Generation: We provide efficient air solutions for power plants, ensuring optimal performance and safety.

3. Chemical and Petrochemical Industries: Our products play a crucial role in chemical processing, refining, and storage.

4. Pharmaceuticals and Healthcare: Clean air is essential in pharmaceutical manufacturing and healthcare settings.

5. Construction and Infrastructure: Our blowers contribute to HVAC systems, construction sites, and infrastructure projects.

6. Food and Beverage: From food processing to breweries, our solutions maintain hygiene and efficiency.

7. Environmental Protection: Our dust collectors support clean air initiatives and pollution control.

Choose **Tiger Engineering Company** for reliable, industry-specific solutions!   

Summary

Tiger Engineering Company, a trusted name in the market, crafts a diverse range of electrical products. From Ventilation Fans to High-Pressure Blowers, our offerings redefine quality and endurance. Our secret? Impeccable raw materials sourced from reliable vendors. Backed by skilled staff and rigorous quality checks, we ensure defect-free products.

Thank you
